» WHY WE THINK SUSTAINABLY

We have the privilege of living and working in a place surrounded by nature. For over a hundred years, we have been based in the Odenwald and Westerwald. Consequently, we are well aware of what we owe ourselves, our families, society and our partners. For us, appreciation of nature and respect for human beings is the key to responsible trading.

As a fourth-generation family business, we treat things with care and conduct our operations on a sustainable basis. We view the efficient use of resources throughout the entire product life cycle as a self-evident maxim. When you buy a MAUL product, you can rest assured that it was manufactured under socially responsible conditions with minimal environmental impact.

We firmly believe in Germany as a business location and have expanded our production facilities in Zell and Kirchen. We invest and pay taxes here, create and retain apprenticeships and jobs, and actively take responsibility for the future of our region.

For further information, go to www.maul.uk and take a look at our Sustainability Brochure.

„We are certified for our environmental management system according to the international standard ISO 14001“.

The River Mümling flows through MAUL's site in Bad König-Zell.

Electrical discharge machine,
Tool making from MAUL

» WHY WE KNOW OUR TRADE

For generations, we have been manufacturing products in Bad König and Kirchen that simplify day-to-day office tasks – always with a keen eye for detail.

Our specialists in the fields of metal manufacturing, plastics production and electronics work with great care and precision on every single component. As we select the materials and develop the products ourselves, we can guarantee top quality and high-end design. Our intelligent testing processes ensure that all MAUL products conform with high safety standards and are of a consistently high quality.

To find out more,

» WHY WE LOVE WHAT WE DO

MAUL employees from Sales and Marketing
with the mobile whiteboard easy2move

MAUL is an international brand-name company with production facilities at two locations in Germany. Over one thousand innovative products made from plastic and metal are manufactured here. We draw on our ingenuity, experience and flexibility to design and produce a multitude of creative new products. As a result, we are able to add exciting new products to our product range year after year. This innovative capability is evident from our numerous utility models and patents.

The skills of the 180-strong MAUL workforce combined with our enthusiasm for progress and our high-tech in-house production facility are what makes us so good at what we do. We act quickly and flexibly, with a high level of motivation and identification with our work. Our focus is not on short-term solutions, but on good, durable, creative products – in line with our company philosophy, which has proved successful for more than a hundred years.

To find out more,

» DURABLE, RESILIENT AND STABLE

The robust surfaces of our panels can also withstand prolonged stress. In this respect, we choose high-quality material for our tried and tested textile, cork and whiteboard surfaces.

New from MAUL: our acoustic fleece. This modern polyester fibre material made in Germany is particularly suitable for sound absorption. Certified according to **ÖKO-TEX® Standard 100** (Class 1, compliant with ISO 17050-1) and with a recycled content of 20%, our acoustic fleece is particularly sustainable and can be fully recycled. It is allergy-friendly and harmless to health. It is also dimensionally stable and extremely tear-resistant, yet very light. This is important, because our movable walls should be able to be quickly converted or rearranged. So it's a real all-rounder.

THE FRAME MAKES THE DIFFERENCE

It should be stable, light and look good all in one. With decades of experience with aluminium frames for boards, this was an easy exercise for our development team. The trick is the H-section's ability to accommodate panels on both sides. This allows the MAUL-connecto series to be changed quickly – sometimes the whiteboard is on top, sometimes the sound-absorbing acoustic material. And yet the frame retains its shape over time, because the material thickness and profile geometry are cleverly designed and verified by load tests.

greener@work SUSTAINABLY DEVELOPED AND MANUFACTURED

Our movable walls are planned sustainably from the idea through use to recycling. In this respect, we focus on durability and high-quality material. The movable walls are produced under socially responsible conditions in our factories in Bad König and Kirchen. Due to the production in Germany, we can guarantee short transport distances. This saves CO₂, as does the fact that the MAULconnecto series can be sent disassembled as a normal parcel rather than as bulky goods.

OPAQUE AND MOBILE

One side Velcro, one side fleece: with this system, we ensure that there is no annoying gap between the walls. This creates real concentration areas and you are protected from unwanted glances while working. And to ensure that this also applies downwards, the walls are almost floor-length. In addition, you can change your wall landscape very quickly with the Velcro/fleece combination. To do so, simply fold two elements together to 0 degrees, detach them and then reconnect them. Without any tools at all.

CASTOR WHEELS, FEET OR CLAMPS?

Your movable wall stands on sturdy feet made of high-quality steel. Depending on how mobile you wish the movable walls to be, you can choose between adjustable feet or castor wheels (with locking brake). The desk dividers are attached to the desktop with sturdy clamping feet. Whatever you decide: we ensure stability, as we have been working with metal for over a hundred years.

TECHNICAL SAFETY CONCEPT MADE BY MAUL

All our experience as a German lighting manufacturer goes into the lighting modules of our MAUL Uplight movable walls. As with all MAUL lighting, we also meticulously comply with the current legal requirements in this area. Our experts in optics, electronics and mechanics test every component to ensure safety.

TIPS FOR LESS NOISE STRESS

- Look out for low-noise devices when buying work equipment
- Place loud devices in their own rooms
- Offer alternative rooms or soundproof booths for concentrated work
- Arrange time slots for meetings
- Use sound-absorbing partition walls

» WORKING UNDISTURBED WITH THE RIGHT ACOUSTICS

WHY IT SHOULDN'T BE TOO LOUD

Noise is one of the most significant stress factors in the workplace, especially in open-plan offices. Every person perceives noise to be disturbing to different degrees, which makes the issue complex. Under constant stress, physiological symptoms such as premature fatigue or headaches can occur and psychological consequences can also arise, e.g. tension or edginess. In any case, acoustic stress leads to reduced concentration and performance.

THIS MUCH NOISE IS ALLOWED

According to the Technical Rules for Workplaces (ASR) A3.7, noise is „any sound that can lead to a hearing impairment or any other (...) danger to the health and safety of workers“. Noise stress depends on pitch and volume. The recommendation for activities that require a high level of concentration is a maximum sound level of 55 dB(A). For tasks with medium concentration, e.g. jobs in contact with the public, working in a warehouse, it may be a maximum of 70 dB(A). By way of comparison: a busy office is about 70 dB(A), a quiet library about 40 dB(A).

More answers on the subject of acoustics can be found in: ASR A3.7 and DGUV Information 215-443 (Acoustics in the office – aids for acoustic office design).

LIGHT AND HEALTH

With Uplight partitions, light adds another component in the creation of an ergonomic and healthy working environment. Optimal light is created by a combination of daylight, individually controllable direct task lighting and indirect ambient lighting. The Uplight models address the latter, providing pleasant ambient light or serving as orientation lighting. Just like good acoustics, good lighting improves performance and has an influence on health and well-being.

MOVABLE WALL SYSTEMS

Movable wall system MAULcocoon

- **Modular, free-standing acoustic wall for less noise stress and improved room acoustics**
- **Good sound absorption: reduction of the noise level, more sound insulation, thus better concentration and less distraction**
- **Made in Germany: sustainable and socially responsible manufacturing, 5-year warranty**
- **Environmentally friendly & allergy-friendly: certified according to ÖKO-TEX® Standard 100 class 1, 100% PES fibres (polyester fibres), 20% of which are recycled, formaldehyde-free, odourless, flame-retardant according to DIN 4102 (B1)**
- **High-quality: elegant aluminium profile, thick acoustic fleece (4000 g/m²), with high dimensional stability**
- **Extremely flexible: can be interlinked seamlessly by velcro connections**
- **Open Space solutions: creates concentration areas with better acoustics, privacy space and visual protection**

- Sound insulation at a desk, in team offices or call centres, for modern office concepts or mobile offices, in a conference room or meeting room, for a room-in-room solution or in a home office
- Redesign rooms: set up wall sequence and installation angles (only possible with base), assemble quickly and easily rearrange at any time without tools
- Design: rounded corners, elegant combination of frame colour and surface
- Frame in three colours (white, anthracite and silver), mottled dark grey acoustic fleece
- Dimensions: 180 x 100 cm, frame thickness 44 mm, 40 mm-thick acoustic fleece
- Can be linked steplessly at any angle from 90° to 180°
- Stable: steel feet or castor wheels (2 lockable)
- Including a levelling foot to compensate for uneven floors
- Almost floor-length, opaque privacy screen: only a 2-cm gap between floor and lower edge of panel
- Colour specification refers to the frame
- Environmentally friendly packaging from recycled cardboard
- Available from 06 / 2023

MAULconnecto - combine different surfaces

MOVABLE WALL SYSTEMS

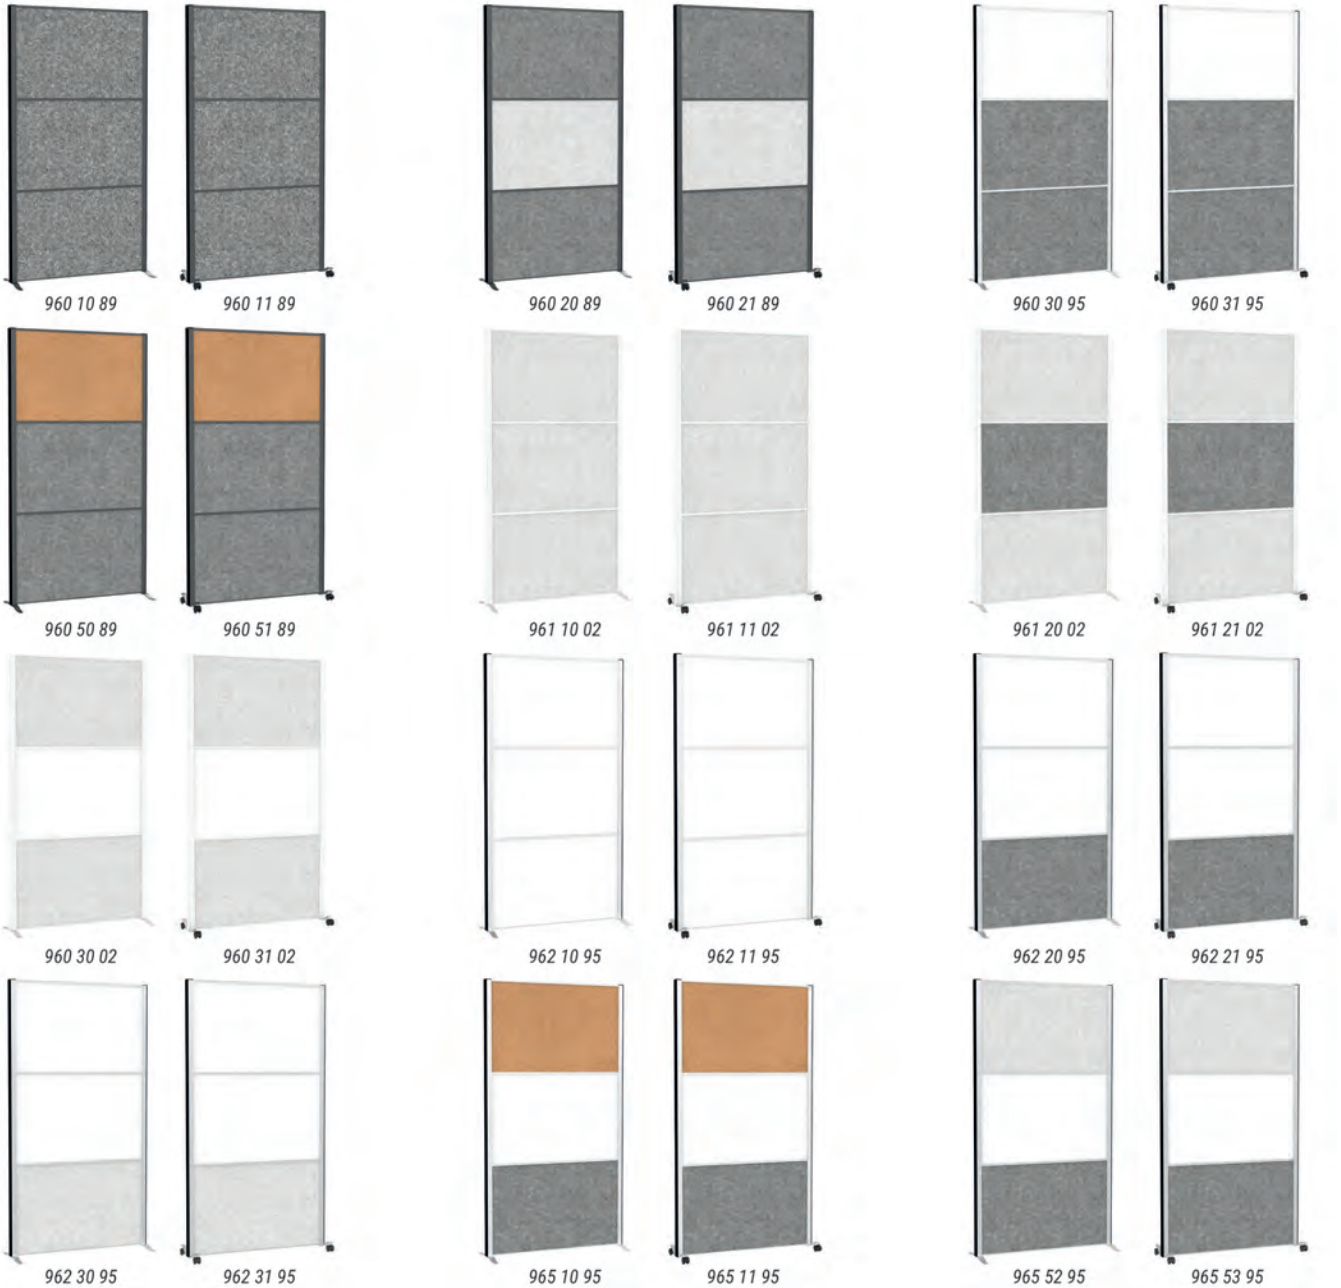

Movable wall system MAULconnecto

- **New work:** modular, free-standing partition wall for modern room concepts; the room divider system combines concentration with communication and is customisable
 - **Open space solutions:** creates concentration areas with noise protection and enhanced acoustics, privacy spaces with privacy screen for creative meetings or as an information wall
 - **Made in Germany:** sustainable and socially responsible manufacturing, 5-year warranty
 - **Connect:** 180 x 100 cm movable wall, consisting of three modules each measuring 60 x 100 cm, can be combined in different surfaces, modules inserted and fastened with screws
 - **Extremely flexible:** can be interlinked seamlessly by velcro connections
 - **Redesign rooms:** set up wall sequence and installation angles (only possible with base), assemble quickly and easily rearrange at any time without tools
 - **Five surfaces to choose from, each double-sided: mottled dark grey or light grey acoustic fleece, whiteboard, blue textile and cork pin board**
- In an office around a desk, in a call centre, conference room or meeting room, for a room-in-room solution or in a home office
 - Elegant design: modern combination of frame colour and surface, discreet profile with rounded edges and decorative grooves
 - Almost floor-length, opaque privacy screen: only a 2-cm gap between floor and lower edge of panel
 - High quality: surrounding aluminium frame profile (thickness 44 mm) in the colours white, anthracite and silver
 - Can be linked steplessly at any angle from 90° to 180°
 - Stable: steel feet or castor wheel feet (2 lockable)
 - Including a levelling foot to compensate for uneven floors
 - Acoustics: high sound absorption, 100% PES fibres (polyester fibres), 20% of which are recycled, certified according to ÖKO-TEX® Standard 100 class 1, formaldehyde-free, odourless, allergy-friendly, B1 flame retardant, thickness 40 mm, 4000 g/m², pressure-resistant, high dimensional stability
 - Cork: natural, the pin sits firmly, self-healing for permanent use
 - Textile: pinnable surface, tightly woven, abrasion-resistant and self-healing for permanent use
 - Whiteboard: suitable for magnets and white board markers, very good dry-wipe
 - Colour specification refers to the frame
 - Environmentally friendly packaging from recycled cardboard, no bulky cargo
 - Available from 06 / 2023

MOVABLE WALL SYSTEMS

Movable wall system MAULconnecto Uplight

- **Modular, free-standing acoustic wall with LED light for less noise stress and indirect ambient lighting close to the workplace**
- **General ambient light via an upward-radiating LED module**
- **Good sound absorption: reduction of the noise level, more sound insulation, thus better concentration and less distraction**
- **Made in Germany: sustainable and socially responsible manufacturing, 5-year warranty**
- **Environmentally friendly & allergy-friendly acoustic fleece: certified according to ÖKO-TEX® Standard 100 class 1, 100% PES fibres (polyester fibres), 20% of which are recycled, formaldehyde-free, odourless, flame-retardant according to DIN 4102 (B1)**
- **Extremely flexible: can be interlinked seamlessly by velcro connections**
- **Extremely economical thanks to state of the art LED technology**

- Open space solutions: concentration areas with enhanced acoustics, privacy spaces and visual protection
- In an office around a desk, in a call centre, conference room or meeting room, for a room-in-room solution or in a home office
- Dimensions: movable wall 180 x 100 cm, consisting of 3 modules each measuring 60 x 100 cm
- Elegant design: modern combination of frame colour and surface, discreet profile with rounded edges and decorative grooves
- High-quality: elegant aluminium profile, thick acoustic fleece (4000 g/m²), with high dimensional stability
- Stable: steel feet or castor wheels (2 lockable)
- Including a levelling foot to compensate for uneven floors
- Can be linked steplessly at any angle from 90° to 180°
- Redesign rooms: set up wall sequence, assemble quickly and easily rearrange at any time without tools
- Powerful LED module, discreetly inserted into a profile as a linear light source
- Light source: colour temperature 4000 Kelvin (neutral white), weighted energy consumption 17 kWh/1000 h, service life 50.000 h, useful luminous flux 2.500 lumens, energy efficiency class C (spectrum A to G)
- Technical safety concept Made by MAUL
- Homogeneous light emission and dust protection: high-quality polycarbonate diffuser, easy to clean
- Toggle switch on/off on the lamp
- Colour specification refers to the frame
- Environmentally friendly packaging from recycled cardboard, no bulky cargo
- Available from 06 / 2023

Item	Colours	Base	Surface	PU

MOVABLE WALL SYSTEMS

Desk divider MAULconnecto

- Acoustic partition wall for improved room acoustics and visual protection
- Good sound absorption: reduction of the noise level, more sound insulation, thus better concentration and less distraction
- Made in Germany: sustainable and socially responsible manufacturing, 5-year warranty
- Environmentally friendly & allergy-friendly: certified according to ÖKO-TEX® Standard 100 class 1, 100% PES fibres (polyester fibres), 20% of which are recycled, formaldehyde-free, odourless, flame-retardant according to DIN 4102 (B1)
- Stable mounting: two clamping feet made of robust steel for desk tops up to 7,5 cm
- High-quality: elegant aluminium profile, thick acoustic fleece (4000 g/m²), with high dimensional stability

- Sound insulation at a desk, in team offices or call centres, for modern office concepts or in a home office
- Suitable for the movable wall systems MAULcocoon and MAULconnecto
- Open space solutions: creates concentration areas with noise protection, privacy spaces and visual protection
- Ideal for height-adjustable desks: holds firmly while height is adjusted, divider height is maintained
- Modern colour combinations: light or dark grey fleece with frame in anthracite, silver or white
- Frame thickness 44 mm, 40 mm-thick acoustic fleece
- Good visual protection: distance to desk top approx. 7,5 mm
- Colour specification refers to the frame
- Environmentally friendly packaging from recycled cardboard
- Available from 06 / 2023

Item	Colours	Divider length	Surface	PU

MOVABLE WALL SYSTEMS

Desk divider MAULconnecto Uplight

- Acoustic partition wall with LED light for less noise stress, visual protection and indirect ambient lighting close to the workplace
- With indirect general room lighting via infinitely dimmable LED module radiating upwards
- Good sound absorption: reduction of the noise level, more sound insulation, thus better concentration and less distraction
- Made in Germany: sustainable and socially responsible manufacturing, 5-year warranty
- Environmentally friendly & allergy-friendly acoustic fleece: certified according to ÖKO-TEX® Standard 100 class 1, 100% PES fibres (polyester fibres), 20% of which are recycled, formaldehyde-free, odourless, flame-retardant according to DIN 4102 (B1)
- Stable mounting: two clamping feet made of robust steel for desk tops up to 7,5 cm
- Extremely economical thanks to state of the art LED technology

- Open space solutions: creates concentration areas with enhanced acoustics, privacy spaces and visual protection
- Sound insulation and visual protection at a desk, in team offices or call centres, for modern office concepts or in a home office
- Ideal for height-adjustable desks: holds firmly while height is adjusted, divider height is maintained
- High-quality: elegant aluminium profile, thick acoustic fleece (4000 g/m²), with high dimensional stability
- Modern colour combinations: dark grey fleece with frame in anthracite; light fleece with frame in white
- Frame thickness 44 mm, 40 mm-thick acoustic fleece
- Good visual protection: distance to desk top approx. 7,5 mm
- Suitable for the movable wall systems MAULcocoon and MAULconnecto
- Powerful, energy-saving LED light with diffuser for gentle dimming
- LED module discreetly inserted into a profile as a linear light source
- Light source for 120 cm wide divider: colour temperature 4.000 Kelvin (neutral white), weighted energy consumption 20 kWh/1000 h, service life 50.000 h, useful luminous flux 2.900 lumens, energy efficiency class C (spectrum A to G)
- Light source for 160 cm wide divider: colour temperature 4.000 Kelvin (neutral white), weighted energy consumption 27 kWh/1000 h, service life 50.000 h, useful luminous flux 4.100 lumens, energy efficiency class C (spectrum A to G)
- Technical safety concept Made by MAUL
- Homogeneous light emission and dust protection: high-quality polycarbonate diffuser, easy to clean
- Convenient: stepless adjustment via side-mounted rotary dimmer
- Colour specification refers to the frame
- Environmentally friendly packaging from recycled cardboard
- Available from 06 / 2023

» MAUL LAMPS WITH REPLACEABLE LIGHT SOURCES & CONTROL GEARS

IN THE INTERVIEW,
DIPL.-ING. ELECTRICAL ENGINEER
UWE HARTMANN TALKS ABOUT THE
EU ECODESIGN DIRECTIVE*

greener@work

How has MAUL implemented the Ecodesign Directive?

As early as 2016, we were aware that the EU was working on new regulations. It became extremely urgent on 9 December 2019, four days after publication in the Official Journal. As early as January 2020, we began to constructively adapt our lamps. In our new light laboratory, in each case we measured 10 specimens of each lamp in our range and subsequently conducted a 5-month long-term test to determine the lifespan. Nowadays, all our lamps comply with the Ecodesign Directive and all the necessary information, such as illustrated replacement instructions, is provided.

Do all manufacturers and importers adhere to it?

The light sources in the lamps of many market players are still not replaceable. If the light source is defective, the whole lamp must be discarded. This is anything but sustainable. The replaceability of light sources and control gears – a key objective of the Ecodesign Directive – has clearly not been met.

There is something brazen about, of all things, lamps with built-in light sources being advertised with a relatively good efficiency rating. Moreover, when determining the class, in this instance the entire lamp must be measured. However, many market players only take the data for the light source in order to obtain a more favourable result with advertising appeal.

How does the customer find out whether the lamp has a replaceable light source?

Every lighting supplier must indicate the replaceability of light sources and control gears, at least with a pictogram, on their website, packaging and operating instructions. There must also be disassembly instructions on the supplier's website.

Finally, the new consumer authority comes into play! This authority is called EPREL. Every light source, whether available separately or as part of a lamp, must be registered in EPREL, an EU database, otherwise it is not allowed to be sold in the EU.

The customer can check this registry by scanning the QR code on the energy efficiency label with their smartphone. If the product is registered, they are automatically taken to an EU page. The customer can compare the technical data indicated there directly with the supplier's advertising claims.

Find more information about the Energy Efficiency Labelling Directive here:

What is the aim of the Ecodesign Directive?

The Ecodesign Directive is part of the European Green Deal and ecodesign includes all "energy-related products", such as light sources, washing machines, televisions, etc. The Ecodesign Directive is a legal building block in the transformation of the current throwaway economy into a sustainable circular economy. On the one hand, the lifespan of products must be significantly increased through repairability and on the other, products at the end of their life must be returned to the raw materials cycle.

What is the difference between the Ecodesign* and the Energy Labelling Directives*?

The Ecodesign Directive for light sources governs minimum requirements regarding repairability, ability to be dismantled and functionality. Energy labelling supports the selection of efficient light sources with a scale ranging from A for "excellent" to G for "just sufficient". Both directives are closely interconnected and virtually homogeneous.

"With good ecodesign, it is considerably easier to achieve a good efficiency rating. Conversely, a poor ecodesign can never lead to a more than just sufficient efficiency rating."

Which guidelines are laid down in the Ecodesign Directive?

It differentiates between light sources, control gears and the surrounding products and stipulates that light sources and control gears must be replaceable. A light source is what we traditionally know as a bulb. A control gear is the electronic system required to operate the light source. Ecodesign also encompasses the minimum requirements in terms of functionality, e.g. the lifespan or light quality.

* Regulation (EU) 2019/2020 of 1/10/2019 laying down ecodesign requirements for light sources and separate control gears and Regulation (EU) 2019/2015 of 11/03/2019 with regard to energy labelling of light sources.

DESK LAMPS

LED desk lamp MAULoptimus colour vario, dim.

- The best in terms of quality, design and longevity
- Stepless adjustment of illuminance and colour temperature
- Supporting biological effective lighting solutions, e.g. for increasing concentration or efficiency
- Made in Germany: developed and produced in our national plant, 3 years guarantee
- Extremely economical: latest LED technology. Double-checked in the MAUL test laboratory
- Ref. 820 67 95 is winner of the German Innovation and Design Award 2018

- Very large illumination radius and exact positioning by means of long double
- Memory function: all settings are automatically saved when the lamp is switched off
- Safe: a high-tech diffusion screen provides a homogeneous light distribution
- Large cooling surface for optimal thermal management
- Comfortable: dimming via a rotary switch integrated in the lower joint
- Light source and operating device replaceable by an electrician
- Environmentally friendly recyclable packaging, free of plastic

Illuminance of the lamp:	2.500 lux illuminance at 35 cm distance
Colour temperature per light source:	2.700 Kelvin (warm white) to 6.500 Kelvin (daylight white)
Number of light sources:	1
Energy efficiency class per light source:	E (spectrum A to G)
Weighted energy consumption per light source:	8 kWh/1000 h
Service life L70B50 per light source:	20.000 h
Useful luminous flux per light source:	853 Lumen
Material:	Head: anodised aluminium - Arm: anodised aluminium, Joints: break-proof plastic
Dimensions:	Head: 12 x 5,5 cm
Movement:	Head: inclinable, rotatable

- 820 66: Stable metal clamp base (clamping width: 7 cm). Lower arm length: 45 cm, upper arm length: 42,5 cm. Height: 50 cm. Arm: inclinable, rotatable
- 820 67: Stable base, Ø approx. 22 cm, with steel weight inlay and desk protection pad. Lower arm length: 45 cm, upper arm length: 42,5 cm. Height: 53 cm. Arm: inclinable, rotatable

Item	Colours	Base	Cable length (approx.)	Protection class	PU
820 66	89 anthracite, 95 silver	Clamp	1,75 m	II wall power adapter EU plug	1 pc(s).
820 67	89 anthracite, 95 silver	Base	1,75 m	II wall power adapter EU plug	1 pc(s).

DESK LAMPS

LED desk lamp MAULsolaris

- The best in terms of quality, design and sustainability
- Made in Germany: developed and produced in our national plants, 3 years guarantee
- Long-life: better thermal management thanks to larger cooling area
- More power thanks to higher illuminance
- High energy efficiency
- More secure: homogeneous light distribution and optimized glare protection due to high-quality diffuser made of PMMA, reduced maximum luminance protects the eyes

- Design "Made by Reutershahn"
- Extremely economical: latest LED Technology
- Long service life
- Guaranteed: no consumption in switch-off mode
- Double-checked in the MAUL test laboratory
- Integrated power supply in base
- Light source and operating device replaceable by an electrician
- Environmentally friendly recyclable packaging, free of plastic

Illuminance of the lamp:	4.300 lux illuminance at 25 cm distance
Colour temperature per light source:	4.000 Kelvin (neutral white)
Number of light sources:	1
Energy efficiency class per light source:	E (spectrum A to G)
Weighted energy consumption per light source:	5 kWh/1000 h
Service life L70B50 per light source:	50.000 h
Useful luminous flux per light source:	604 Lumen
Base:	Base
Material:	Head: anodised aluminium - Arm: anodised aluminium - Foot: metal - Base: desk protection pad
Dimensions:	Height: 64,3 cm, Height adjustable from 25 to 62 cm - Head: 12 x 5,5 cm - Arm: length 55 cm - Base: 19 x 16 cm
Movement:	Head: inclinable, rotatable - Arm: inclinable
Position of the switch:	Base

Item	Colours	Cable length (approx.)	Protection class	PU
820 60	89 anthracite, 95 silver	1,90 m	II europlug	1 pc(s).

COLOUR MY WORK

» OUR CONTRIBUTION TO SUSTAINABILITY

Light sources of MAUL lamps are no longer permanently installed, but replaceable. This means that lamps do not have to be completely disposed of if the light source is defective. This conserves valuable resources, extends the service life of the lamps, allows for material separation at the end of life for recycling and complies with the Ecodesign Ordinance 2019/2020.

WHITEBOARDS / ACCESSORIES FOR PRESENTATIONS

Whiteboard MAULfun

- **Versatile:** for appointments, information or notes
 - **Practical:** with loop for hanging up

» IMPROVE YOUR WORKSTATION WITH FOOTRESTS

Using a footrest, you can create a stress-free and ergonomically-efficient workstation in three easy steps.

The first step:
Correctly position your seat.
Your upper arm must be vertical, while your lower arm must be parallel to the table's surface – the height of the seat's surface must be adjusted.

The second step:
Your thigh should lie horizontally on the seat – the height of the footrest must be adjusted.

The third step:
Your thigh and lower leg should form an angle of at least 90° – the incline of the footrest must be adjusted.

Poor posture when working at a desk can reduce a worker's productivity by up to 40%. The footrest prevents unnecessary performance loss due to poor posture at work, as it facilitates a comfortable and relaxed posture.

We plan our products sustainably over their entire life cycle, from the idea through use to disposal. Environmental awareness can thus be seen in many aspects: use of recycled materials, resource-saving use of materials, recyclable designs in accordance with VDI guidelines for easy dismantling and sorted recycling, repair offers, low-pollutant production, energy-saving technology, solar technology, plastic-free packaging. Our ISO 14001 environmental management system ensures that the most sustainable solution is found at every stage of our products' long life.

Find out more in our sustainability brochure at www.maul.uk or scan the QR code at the bottom right of this page.

» MAUL PRODUCTS WITH THE BLUE ANGEL LABEL

We are particularly proud of our products certified with Blue Angel, the German government's environmental label for over 40 years. The independently awarded eco-label distinguishes products boasting environmental excellence, with the entire life cycle being examined during the assessment. The criteria are public, clearly defined and include certification regulations.*

According to the award criteria in UZ No. 116, solar letter or parcel scales must achieve their full function at an illuminance of 150 lux. In addition, our technical professionals have integrated a gold capacitor that stores excess energy and makes it available in darker lighting conditions.

Full functionality at a mere 50 lux even applies for ECO calculators. In addition, our three sustainable models are made of 80% recycled plastic and the packaging is also made of recycled material.

Blue Angel UZ 30a plastic products must contain at least 80% post-consumer recycled material. Our greener@work desk accessories even have 85% recycled plastic. The packaging is an FSC-certified cardboard or a film made from post-industrial recycled material.

» YOU CAN COUNT ON US

Whether they're used in educational or private settings, desktop and pocket calculators are important tools which many people rely on. At MAUL, we have the right model for all of the most important areas of application, allowing you to find the right solutions quickly and conveniently.

Precision, style and reliability – these are the areas where our calculators shine, as we are motivated to ensure **high quality** and **stylish design**. Our range includes compact pocket calculators, calculators for sales applications (for example with a tax calculation function) and ergonomically designed printing calculators for commercial use.

All calculators (except the printing models) can run on **solar power to save energy**, in line with the **MAUL sustainability goals**. What's more, all of our desktop and pocket calculators come with a **5-year warranty**.
