smile@work

For a smile at the office.

WHY WE LOVE WHAT WE DO

MAUL manufactures innovative office products and creates solutions for the new world of work. As a family-owned international brand-name company with a 112-year history, we combine new technologies and sustainability with quality and craftsmanship. 180 MAUL employees at two locations in Germany work to make you more efficient, more creative and more mobile - for a smile at the office. We bring our vision to life with innovation and passion: MAUL smile@work.

WHY WE KNOW OUR TRADE

For generations, we have been manufacturing products in Bad König and Kirchen that simplify day-to-day office tasks – always with a keen eye for detail. Our specialists in the fields of metal manufacturing, plastics production and electronics work with great care and precision on every single component. Our intelligent testing processes ensures that all MAUL products conform with high safety standards and are of a consistently high quality. As we select the materials and develop the products ourselves, we can guarantee top quality and high-end design. It's not about short-term solutions, but about good, sophisticated, long-lasting products.

WHY WE THINK SUSTAINABLY

From the very beginning, our home has been here in the Odenwald and Westerwald, and we are committed to Germany as a manufacturing location. For us, appreciation of nature and respect for human beings is the key to responsible trading. We view the efficient use of resources throughout the entire product life cycle as a self-evident maxim. When you buy a MAUL product, you can rest assured that it was manufactured under socially responsible conditions with minimal environmental impact - and that's for sure.

For further information, go to **www.maul.uk** and take a look at our Sustainability Brochure.

„We are certified for our environmental management system according to the international standard ISO 14001."

ISO 14001 CERTIFIED
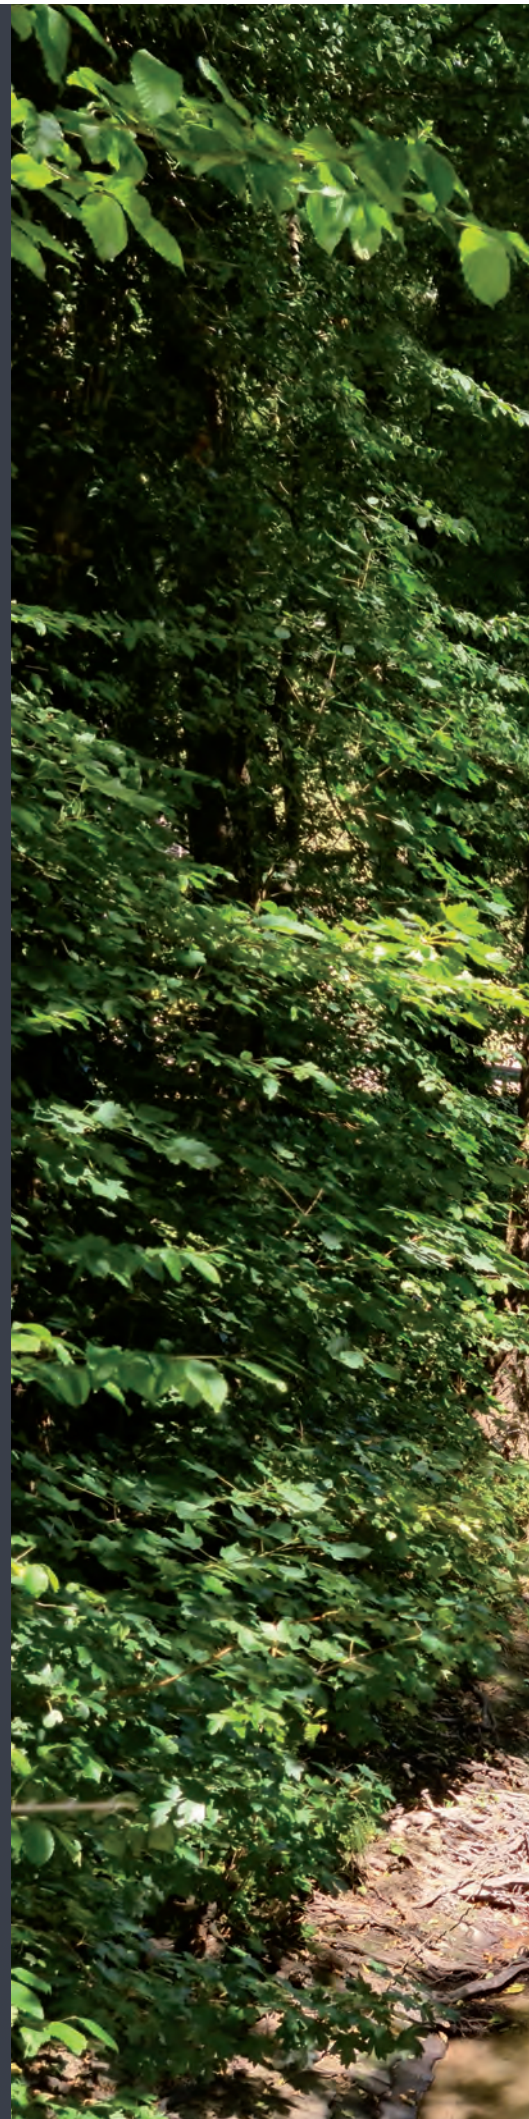

The river Mümling flows through MAUL's site in Bad König-Zell.
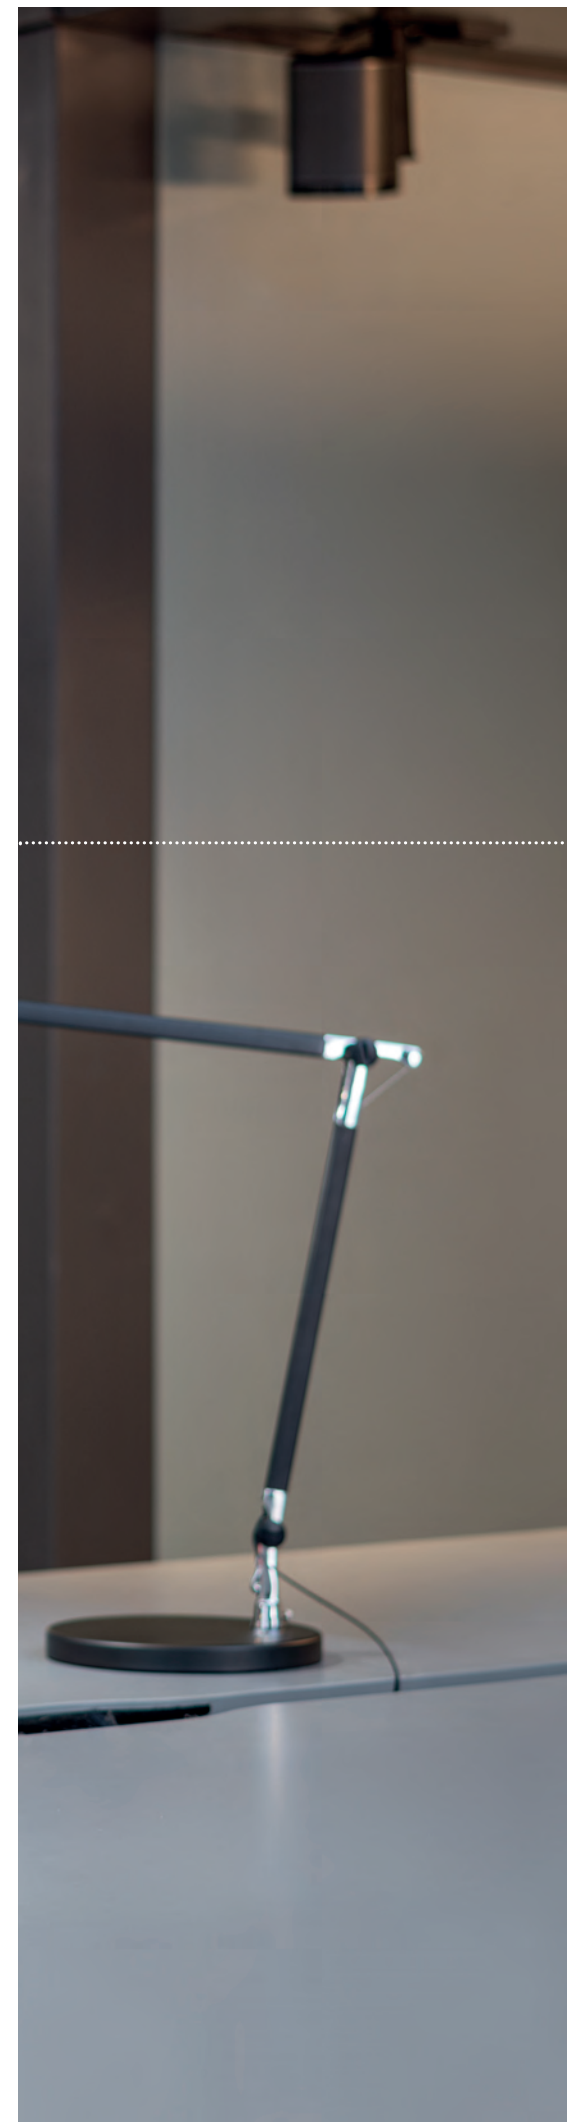

»Lighting

Our lamps provide many illuminating moments and make an impression with their elegant design, energy efficiency, safety and reliable quality. With around 80 models, we offer an efficient and comprehensive range that allows light to be customised to the task and the person. We are focussing on LED as the future form of lighting and we are also pioneers when it comes to energy management.

Offering a trend-setting concept, the light sources and control gear are interchangeable in all MAUL lights. This conserves valuable resources, extends the service life of the lights, allows material separation for recycling and complies with the eco-design directive – simply greener@work.

»The right light for modern working environments

HEALTHY LIGHT

With the right lighting, you can significantly improve your performance and well-being. Too little light, glare or harsh contrasts affect health and performance. The more closely you adapt the light to your workplace situation, the better the result. Make sure that the lamp head and joints are mechanically adjustable. Double dynamic light (change in brightness and colour temperature), as well as the integration of daylight, promote pleasant and healthy working conditions.

OPTIMAL LIGHTING

The basis for optimal lighting is a balanced, adjustable relationship between daylight, general basic lighting and individually controllable lighting at the workplace. Combine indirect general lighting with direct workplace lighting. This allows you to adjust the light to suit your personal vision, time of day and activity. And save energy by switching off or dimming lights. Once set, luminaires with a daylight sensor reliably regulate our lighting requirements on a daily basis.

SAFE LIGHT

No lamp is included in the MAUL product range unless it has passed intensive tests, both in and outside the company at various test centres, institutes or universities. For example, tests are carried out in the areas of mechanics and statics of feet and joints, electronics (insulation, electromagnetic radiation), optics/safety (eye health, colour rendering). The light sources undergo an intensive endurance test in our long-term test laboratory. At regular intervals performance data is determined, e.g. illuminance or luminous flux. This also enables us to provide reliable information on service life.

 You can learn more about the subject of lighting in our buying guide for lamps

MAUL

LIGHTING

» EU Ecodesign Regulation

THE LIGHT SOURCES AND CONTROL GEAR OF ALL MAUL LAMPS ARE REPLACEABLE

» Fixing instead of dumping

» Longer service life

» Recycling of valuable raw materials

» In accordance with the Ecodesign Regulation (EU) 2019/2020

REPLACE-ABLE

THE AIM OF THE ECODESIGN REGULATION

The Ecodesign Regulation is part of the European Union's „Green Deal", includes all „energy-related products" and is a legal building block for transforming the current throwaway economy into a sustainable circular economy.

REPLACEABILITY

Light sources and separate control gear have to be interchangeable. This means that lights are not completely disposed of, if the light source is defective. The lamp has a longer service life and valuable raw materials can be can be recycled.

HIGHER MINIMUM REQUIREMENTS

The requirements for an efficiency class, service life and light quality have been tightened and adapted to the current state of the art. For example, the minimum efficiency requirements have increased. Each light source must undergo a long-term test lasting approx. 5 months before being launched on the market.

MAUL IMPLEMENTS THE SPECIFICATIONS RELIABLY

We started adapting the designs of our luminaires back in January 2020. In our new lighting laboratory, we measured 10 samples of each MAUL lamp and then subjected them to a 5-month long-term test to determine their service life. Today, all our lamps comply with the Ecodesign Regulation, all light sources are replaceable and all the necessary information, such as illustrated replacement instructions, are available.

LED floor lamp MAULsirius colour vario sensor, dimmable

• High-quality, powerful aluminium design lamp with modern light management
• Constant light control via movement and daylight sensors
• Colour temperature and intensity adjustable depending e.g. on time of day
• Dimmer infinitely adjustable according toindividual requirements
• Gentle on the eyes: Reduced glare to UGR <6 for fatigue-proof vision
• High quality of light: Beam direction 70 % upwards (indirect room lighting) and 30 % downwards (direct light for work surface), separately controllable
• GS-symbol for checked quality, technical safety concept Made by MAUL

LIGHTING

LED desk lamp MAULoffice

• Matured design, trendy material combination
• Professional lamp for the workplace, high lighting quality
• Extremely economical: Lastest LED-technology
• The arm is made from aluminium and held by means of a filigree-designed steel bar with spring
• Anti-glare lamp head and reflector for optimal light distribution
• Space-saving and stable: Both base and metal clamp are included
• Technical safety concept Made by MAUL

Item	821 50
Colours	95 silver
Bulb	8291505
Base	clamp, base
Illuminance of the :	2.620 lux illuminance at 35 cm distance
Colour temperature*:	3.000 Kelvin (warm white)
Energy efficiency class*:	E (spectrum A to G)
Weighted energy consumption*:	12 kWh/1000 h
Useful luminous flux*:	1.450 Lumen
Dimensions	Height: 55,5 cm Head: 21,5 x 9,2 cm Arm: lower arm length 41 cm, upper arm length 41 cm Base: 22,8 x 22,8 cm, clamping width: 0 - 5,5 cm

Intertek GS

» How to light properly?

INDIRECT

DIRECT
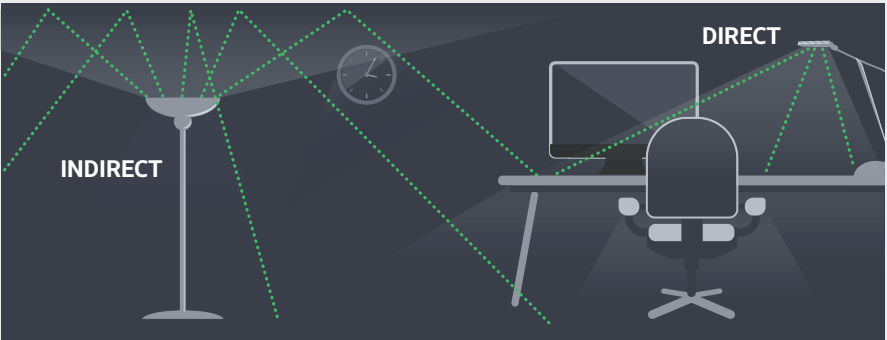

The more closely you adapt the light to your workplace situation, the better the result.

The requirements differ greatly, as different illuminance levels are needed depending on the visual task, age, time of day and season. Ambient conditions (daylight, room size, surface colour and texture, i.e. matt or glossy) also play a major role in the lighting effect.
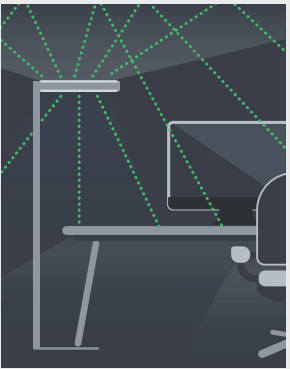

The optimal solution is a balanced combination of daylight, general lighting and individually controllable lights at the workplace. By combining indirect general lighting with direct workstation lighting, an optimal lighting situation can be achieved.

The advantages:
• At each workstation, the illuminance can be individually adjusted depending on the person and activity
• You can save energy by setting the basic lighting which is usually lower than the workplace lighting brighter only when needed (e.g. when someone passes by), especially in unused areas. Luminaires with sensors take care of this for you automatically
• High flexibility for spatial changes
• No reflections or glare on the screens

» The MAUL test laboratory

We subject our prototypes to various tests on a mandatory basis, both in-house and at various test laboratories, institutes or universities. This enables us to provide answers to the following questions:

MECHANICS / STRUCTURAL ANALYSIS:
Is the base stable? Is the clamp fitting sufficient? Can the hinges withstand frequent movement?

ELECTRONICS / SAFETY:
Is the insulation sufficient? How high is the electromagnetic radiation? Does the light pose a fire risk?

OPTICS / SAFETY:
Does the lamp emit disturbing light? Does it lead to permanent eye damage? Is the light the right colour? Are colours of illuminated objects accurately reflected?

SERVICE LIFE:
A durability test is performed on the light sources at our permanent testing laboratory. Performance data is determined in regular intervals e.g. the illuminance, light current or the temperature. Thanks to the durability tests, we are able to provide reliable information on the service life of our products.

Further tests carried out are the inspections of incoming goods in accordance with test procedures based on standards; spot checks, whereby lights are disassembled and checked for possible changes and uncertainties, alongside drop and packaging tests.

MAUL

LIGHTING

Desk lamp MAULfinja, excl. bulb

- Sophisticated matt black and silver metallic design
- Elegant work place light, attractive price/performance ratio
- Flexible: Head can be adjusted in all directions
- Elegant design: Creates a harmonious work environment in offices, at home, at hotels
- Suitable for smart home if used with an appropriate bulb
- Solid: Robust steel arm and base
- Technical safety concept Made by MAUL

LED workstation lamp MAULexplore, dimmable

- High-performance LED lamp
- Special lamp for demanding professionals: Ideal for work in laboratories, workshops, technical offices and studios
- Convenient: Steplessly dimmable
- Robust metal arm
- Three-dimensional adjustable lamp head for optimum illumination of the workplace
- Glare-free working and homogeneous light distribution
- Technical safety concept Made by MAUL

Item	820 56
Colours	02 white
Base	clamp
Illuminance of the :	5.140 lux illuminance at 35 cm distance
Colour temperature*:	6.500 Kelvin (daylight white)
Energy efficiency class*:	E (spectrum A to G)
Weighted energy consumption*:	19 kWh/1000 h
Useful luminous flux*:	2.600 Lumen
Dimensions	Height: 50 cm Head: 8,5 x 58 cm Arm: lower arm length 40 cm, upper arm length 44 cm Base: clamping width: 1 - 6,3 cm
Movement	Head: inclinable, rotatable Arm: inclinable, rotatable
Dimmable - type	stepless

LEDs switchable into 3 areas

LED workstation lamp MAULwork, dimmable

- Powerful LED lamp
- Comfortable: Stepless dimmer, 3 separately switched sectors to adapt the light to the activity or to the required consumption
- Perfect for professionals: Ideal for laboratories, workshops, engineering offices and studios
- High luminosity: 84 power LEDs
- Three dimensional adjustment of the lamp head
- Extremely economical: Latest LED Technology
- GS-symbol for checked security, technical safety concept Made by MAUL

MAUL

LED workstation lamp MAULintro, dimmable

- Powerful, compact workstation LED lamp
- Convenient: Steplessly dimmable
- Powerful and price-attractive model for semi-professional use
- Ideal for precise work e.g. in workshops, for hobbyists, in laboratories or in the field of cosmetics
- Robust metal arm
- Three-dimensionally adjustable lamp head
- Technical safety concept Made by MAUL

Magnifying LED lamp MAULcrystal, dimmable

- Stepless dimming
- Particularly large, clear field of vision, lens 234 cm²
- Powerful: High illuminance
- 3 sector switch (left, right, all light sources) built in the lamp head for easy use
- 3 dioptre lens (magnifies by 75%), 7" x 5,2" (17,8 x 13,2 cm)
- Elegant: Strong metal arm with versatile adjustment
- Technical safety concept Made by MAUL

Switches on head:

» Protection classes

Depending on the level and the type of protection of an electronic device, these are divided into protection classes.

PROTECTION CLASS I

Lamps of this class are equipped with a protective conductor. Thanks to the connection of the protective conductor to the housing of the device it is ensured that in case of any malfunction residual current will flow to the earth. This protection class can be recognized by the earthed shock-proof plug (I).

Shock-proof plug (I)

PROTECTION CLASS II

Lamps of this class are equipped with double insulation or reinforced insulation between live and accessible parts. This class can be recognized by the EURO-plug or the contoured plug. These plugs are double-wired and don't have any safety contact.

Contoured plug (II²) *Wall power adapter EU plug (II*)* *Europlug (II)*

LED flashlight MAULkronos

- For professional use
- High luminous range and intensity, long burn time
- Suitable for outdoor use, splash-proof (IPX4)
- Including batteries
- Variable: Adjustable light cone (zoom function) for large area near light or focused far light beam
- Three light modes: High brightness (100%), low brightness (30%), stroboscopic light (flashes of light) for danger prevention
- Robust housing construction, matt black anodised aluminium, corrosion resistant

» Workplace design

Autonomous teams, agile working methods and hybrid meeting cultures have long since become the norm. The lively office world needs a quiet counterpart that invites you to retreat, for focussed and concentrated work. But how can quiet zones and dynamic working styles be utilised efficiently side by side? The best way to achieve this is with flexible office equipment. Partition wall systems with sturdy metal frames can be conveniently linked together in many ways to create new room-in-room solutions and provide the necessary privacy protection. High tables and desks in meeting niches provide space for spontaneous stand-up meetings.

Identification with our work begins with our place of work - if we feel comfortable in our working environment, we can start the day in a good mood and with commitment. As a brand manufacturer, we are experienced in transforming high-quality metals and plastics into modern and efficient product solutions for the new world of work.

» Welcoming working environments

HEALTHY WORKING

We work every day to make your working day a little more pleasant. The main focus here is on maintaining health. Our ergonomic products support mobility and help to avoid one-sided postures. Ideas such as our standing desk or the flipchart, which is also suitable for use when seated, create flexibility and varied design options for the workspace. With our many years of experience, we know what is important: customising the working environment to people.

FLEXIBLE WORKING

A place to be creative and to focus, but also to exchange ideas with colleagues - that's what we need in a modern office environment. For us to work efficiently and stress-free in this new working world, we need products that help us get through the day. These are solutions that reduce noise and distractions, save space, are mobile and can be moved around quickly. In addition to useful features, we appreciate a good design because we feel comfortable and motivated in an attractive working environment.

RELAXED WORKING

Our specialists in metal and plastics production and our experts in electronics work with commitment and precision on every single component. As we select materials ourselves and design and manufacture products ourselves, we can guarantee premium quality and first-class design. This applies to robust columns, stable castors or large walls. No product is included in the MAUL family if it does not pass intensive testing processes. This enables us to guarantee a consistent level of performance while you work efficiently, safely and in a relaxed manner.
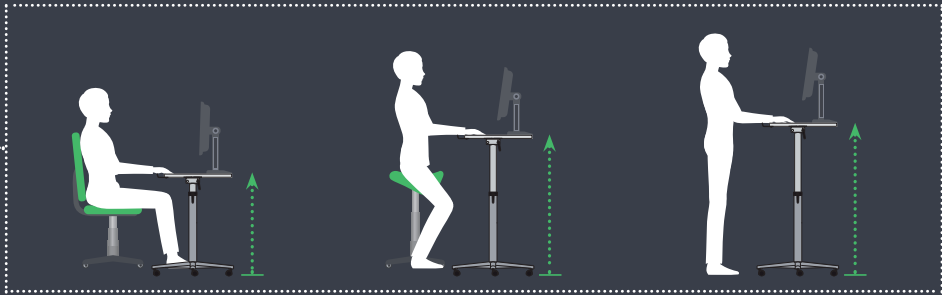

MAUL

Partition wall system MAULcocoon

NEW

- Modular, free-standing acoustic wall for less noise stress and improved room acoustics
- Good sound absorption: Reduction of the noise level, more sound insulation, thus better concentration and less distraction
- Made in Germany: Sustainable and socially responsible manufacturing, 5-year warranty
- Environmentally friendly & allergy-friendly: Certified according to ÖKO-TEX® Standard 100 class 1, 100% PES fibres (polyester fibres), 20% of which are recycled, formaldehyde-free, odourless, flame-retardant according to DIN 4102 (B1)
- High-quality: Elegant aluminium profile, thick acoustic fleece (4000 g/m²), with high dimensional stability
- Extremely flexible: Can be interlinked seamlessly by velcro connections
- Open Space solutions: Creates concentration areas with better acoustics, privacy space and visual protection

Partition wall system MAULconnecto

NEW

- New work: Modular, free-standing partition wall for modern room concepts; the room divider system combines concentration with communication and is customisable
- Open space solutions: Creates concentration areas with noise protection and enhanced acoustics, privacy spaces with privacy screen for creative meetings or as an information wall
- Made in Germany: Sustainable and socially responsible manufacturing, 5-year warranty
- Connect: Partition wall, consisting of three modules each measuring 60 x 100 cm, can be combined in different surfaces, modules inserted and fastened with screws
- Extremely flexible: Can be interlinked seamlessly by velcro connections
- Redesign rooms: Set up wall sequence, assemble quickly and easily rearrange at any time without tools
- Five surfaces to choose from, each double-sided: Mottled dark grey or light grey acoustic fleece, whiteboard, blue textile and cork pin board

WORKPLACE DESIGN
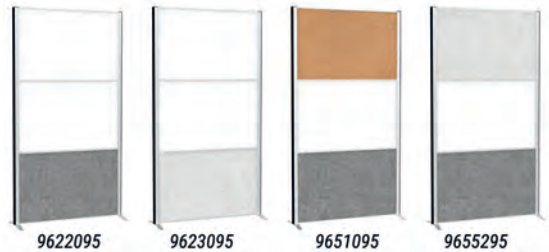

Partition wall system MAULconnecto Uplight

NEW

- Modular, free-standing acoustic wall with LED light for less noise stress and indirect ambient lighting close to the workplace
- General ambient light via an upward-radiating LED module
- Good sound absorption: Reduction of the noise level, more sound insulation, thus better concentration and less distraction
- Made in Germany: Sustainable and socially responsible manufacturing, 5-year warranty
- Environmentally friendly & allergy-friendly acoustic fleece: Certified according to ÖKO-TEX® Standard 100 class 1, 100% PES fibres (polyester fibres), 20% of which are recycled, formaldehyde-free, odourless, flame-retardant according to DIN 4102 (B1)
- Extremely flexible: Can be interlinked seamlessly by velcro connections
- Light source: Colour temperature 4000 Kelvin (neutral white), weighted energy consumption 17 kWh/1000 h (at 85 cm length) / 96 kWh/1000 h (500 cm), service life 50.000 h, useful luminous flux 2.500 lumen, energy efficiency class C (spectrum A to G)

» Durable, hardwearing and stable: Quality Made in Germany

THE FRAME MAKES THE DIFFERENCE

It should be stable, light and look good all in one. With decades of experience with aluminium frames for boards, this was an easy exercise for our development team. Our frame retains its shape over time, because the material thickness and profile geometry is cleverly designed and verified by load tests.

SUSTAINABLE

Our movable walls are planned sustainably from the idea through, the material use to recycling. In this respect, we focus on durability and high-quality material. The movable walls are produced under socially responsible conditions in our factories in Bad König and Kirchen.

AGAINST NOISE POLLUTION, HARMLESS FOR HEALTH

Our acoustic fleece absorbs sound and is certified to ÖKO-TEX® Standard 100 (Class 1, in accordance with ISO 17050-1). With 20% recycled content, it can be 100% recycled. It is allergy-friendly, free of harmful substances, odourless, harmless to health, dimensionally stable and very tear-resistant. Report of the acoustic test on request.

OPAQUE AND MOBILE

One side Velcro, one side fleece - quickly connected and disconnected again. This system ensures that there is no annoying gap between the walls. The walls are almost floor-to-ceiling, so you are protected from prying eyes.

Desk divider MAULconnecto

NEW

- Acoustic partition wall for improved room acoustics and visual protection
- Good sound absorption: Reduction of the noise level, more sound insulation, thus better concentration and less distraction
- Made in Germany: Sustainable and responsible manufacturing, 5-year warranty
- Environmentally friendly & allergy-friendly: Certified according to ÖKO-TEX® Standard 100 class 1, 100% PES fibres (polyester fibres), 20% of which are recycled, formaldehyde-free, odourless, flame-retardant according to DIN 4102 (B1)
- Stable mounting: Two clamping feet made of robust steel for desk tops up to 7,5 cm
- Elegant aluminium profile, thick acoustic fleece (4000 g/m²), with high dimensional stability

- Complete: With flat monitor arm for screens up to 8 kg, two adapters, PC holding and keyboard tray
- Strong: High quality materials, robust processing technique
- Sitting or standing: Stepless adjustable height from 75 cm (sitting height) to 120 cm, platform can be tilted forward + 10°
- Safe: Gentle lowering of desk by means of air damp technology prevents stand from suddenly giving way
- Versatile and healthy: For dynamic office work part-time sitting/part-time standing, or compact workplace, e.g. in sales rooms

Item	Colours	Plate (l x w x h)	Surface	Capacity	PU
931 70	70 wood	60 x 52 x 2,5 cm	multiplex plywood	30 kg	1 pc(s).

Ergonomic table lectern

- Maximum stability and top quality
- Made in Germany, guarantee 3 years
- Strong: High quality materials, robust processing technique
- Healthy: For dynamic office work part-time sitting/part-time standing or compact workplace, e.g. phone calls, laptop or filing work
- Sitting or standing: Stepless adjustable height from 75 cm (sitting height) to 120 cm, platform can be tilted forward + 10°
- Safe: Gentle lowering of desk by means of air damp technology prevents stand from suddenly giving way
- Convenient: Tray for pens and accessories, raised edge at front prevents rolling down

Item	Colours	Plate (l x w x h)	Surface	Capacity	PU
930 40	70 wood	60 x 52 x 2,2 cm	multiplex plywood	30 kg	1 pc(s).
930 41	02 white, 82 grey	60 x 51 x 2,5 cm	melamin	30 kg	1 pc(s).

Ergonomic table lectern

- Unique in stability, quality and function
- Made in Germany, guarantee 3 years
- Versatile: Ideal to enlarge small desks or to be used as standing workplace
- Variable platform height approx. 31 - 43 cm (above the desk)
- Space-saving: Thanks to clamp more available surface
- Back-friendly: Avoids fixed posture, reduces pressure on the spine
- Powerful: High-quality sturdy clamp ensures stability

Item	Colours	Plate (l x w x h)	Surface	Capacity	PU
930 10	70 wood	60 x 52 x 2,2 cm	multiplex plywood	30 kg	1 pc(s).
930 11	02 white, 82 grey	60 x 51 x 2,2 cm	melamin	30 kg	1 pc(s).

High table

- High stability, top quality
- Made in Germany, guarantee 3 years
- Versatile: Can be used as a bistro table, for decorating, as a lectern
- For dynamic office work: Part-time sitting, part-time standing
- High quality: Desk top of melamine resin
- Total height of table approx. 109,5 cm
- Stable: Aluminium base, Ø 61 cm, powder-coated

Item	Colours	Plate (l x w x h)	Surface	PU
932 30	70 wood	60 x 60 x 2,2 cm	melamin	1 pc(s).
932 31	02 white	60 x 60 x 2,2 cm	melamin	1 pc(s).

Side table

- Basic model, low-priced
- For overhead-projectors and all common beamers
- Can be used as a side-table
- Stepless height adjustment from 64 - 100 cm
- Platform with melamine surface, easy to clean
- Sturdy: Steel telescopic column, strong platform
- Mobile: Including 4 castors, 2 lockable

Item	Colours	Plate (l x w x h)	Surface	Capacity	PU
933 10	82 grey	38 x 38 x 1,8 cm	melamin	20 kg	1 pc(s).

Projector trolley MAULpro

- Highest stability and top quality
- Made in Germany, 3 years guarantee
- Sturdy: High quality materials, robust application technique, designed by MAUL metal construction professionals
- Safe: Gentle lowering of the supporting plate by means of air-damp technology prevents stand from suddenly giving way
- Sitting or standing use: stepless height adjustment from 73,5 cm (sitting height) - 120 cm, platform can be tilted forward +10°
- Sturdy: Steel telescopic column, ext. Ø 6 cm
- Star base Ø 61 cm, robust die-cast aluminium with 5 locking castors
- 933 30: With side plate for projector and accessories:3-way earthed socket outlet, 230 V, max. 2500W (GS, VDE) and red lead (compulsory), length of lead 3 m
- 933 31: With side plate for projector

Footrest MAULflair, metal

NEW

- Particularly stable basic model
- Made in Germany, guarantee 3 years
- Robust: Made of 2 mm thick, powder-coated steel, torsion-resistant and scratch-proof
- For maximum comfort: With warm felt covering
- Practical: Anti-slip rubber feet prevent unintentional shifting
- Comfortable: Tilted forward
- Ideal for office and home office

Item	Colours	Footrest area	PU
901 50	02 white, 25 red, 89 anthracite	40 x 30 cm	1 pc(s).

Footrest MAULstandard, nubby

- To adapt posture to desk height: Basic model with large platform
- Platform with knobbed surface for better grip
- Functional: Adjustable in height 2 stages and 6 inclinations
- To adapt posture to desk height
- Well-thought: No disturbing edges, freedom of motion
- Stable: Shock-proof plastic
- Non-slip rubber feet

Item	Colours	Footrest area	PU
901 15	90 black	45 x 35,3 cm	1 pc(s).

Footrest MAULsolid, rubberized

- Very flexible: Basic model, 4 stages
- Non-slippery: Platform with rubberised surface
- Adjustable in height 4 stages and 4 inclinations
- To adapt posture to desk height
- Well-thought: No disturbing edges, freedom of motion
- Stable: Shock-proof plastic
- Non-slip rubber feet

Item	Colours	Footrest area	PU
901 25	90 black	37 x 25 cm	1 pc(s).

WORKPLACE DESIGN

» Improve your workstation with footrests
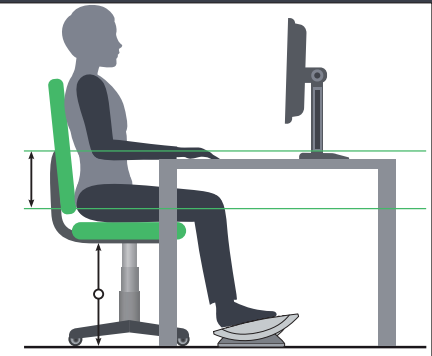

Using a footrest, you can create a stress-free and ergonomically-efficient workstation in three easy steps.

THE FIRST STEP

Correctly position your seat.
Your upper arm must be vertical, while your lower arm must be parallel to the table's surface − the height of the seat's surface must be adjusted accordingly.
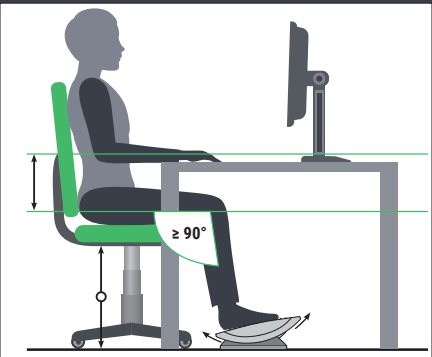

THE SECOND STEP

Your thigh should lie horizontally on the seat
− the height of the footrest must be adjusted accordingly.

THE THIRD STEP

Your thigh and lower leg should form an angle of at least 90° − the incline of the footrest must be adjusted accordingly.

Poor posture when working at a desk can reduce a worker's productivity by up to 40%. The footrest prevents unnecessary performance loss due to poor posture at work, as it facilitates a comfortable and relaxed posture.

≥ 90°

Telephone arm with multifunctional platform

• Also for notebooks, small switchboards, fax, combined units
• Made in Germany, guarantee 3 years
• Arm length 29,8 cm, desk clearance 16,4 cm, revolves through 360°
• Metal clamp foot for desks up to 7,5 cm
• Including two side wings, 4 positioning pins to secure the telephone

Item	Colours	Height	Capacity	Platform	PU
830 42	82 grey	24 cm	5 kg	22 x 35,7 cm	1 pc(s).

Telephone arm elegant

• Revolves through 360°
• Made in Germany, guarantee 3 years
• With two side wings
• Arm extendable to 1 m total length, cable management on the scissors
• Column height 40,5 cm, desk clearance 18 cm
• 4 positioning pins to secure the telephone, auxiliary joint for frontal positioning of the telephone
• Clamp foot for desks up to 7,5 cm

Item	Colours	Height	Capacity	Platform	PU
831 32	82 grey	40,3 cm	5 kg	22 x 35,7 cm	1 pc(s).

Telephone arm elegant with wall-mounting

• With two side wings
• Made in Germany, guarantee 3 years
• Arm extendable to 1 m total length, cable management on the scissors
• 4 positioning pins to secure the telephone
• Auxiliary joint for frontal positioning of the telephone

Item	Colours	Height	Capacity	Platform	PU

WORKPLACE DESIGN

Mobile presenter

- Highly functional: For presenting info-sheets: Posters, proofs, technical drawings, flipchart sheets
- Versatile: For changing venues, easily moved thanks to castors
- Made in Germany, guarantee 3 years
- Telescopic adjustable from 140 - 200 cm
- Advantage of the magnetic clips: Documents only have to be pushed into the clips and they snap shut themselves, thus allowing large documents to be affixed by one person
- Can be extended for up to 6 swivel arms

Item	Colours	PU
625 60	84 grey	1 pc(s).

Table presenter

- Highly functional: For presenting info-sheets: posters, proofs, technical drawings, flipchart sheets
- Space-saving: Stable steel clamp
- Made in Germany, guarantee 3 years
- Advantage of the magnetic clips: Documents only have to be pushed into the clips and they snap shut themselves, thus allowing large documents to be affixed by one person
- Aluminium swivel arm A1 (100 cm, 80 g/m²) with 3 sliding magnetic clips
- Can be extended for up to 4 swivel arms
- Stable silver anodised support extendable to 120 cm above the desk

Item	Colours	PU
625 50	84 grey	1 pc(s).

Wall presenter

- Highly functional: For presenting info-sheets: posters, proofs, technical drawings, flipchart sheets
- Swivelable: Can be mounted on the wall
- Made in Germany, guarantee 3 years
- Advantage of the magnetic clips: Documents only have to be pushed into the clips and they snap shut themselves, thus allowing large documents to be affixed by one person
- Including mounting material
- Attractive design, high quality material
- Creates a lot of space: 2 aluminium swivel arms A0 (132 cm, 80 g/m²) with 3 sliding magnetic clips each, can be extended to up to 8 swivel arms

Item	Colours	PU
625 30	84 grey	1 pc(s).

Swivel arm for presenter

- For extension of presenters (please observe max. load)
- Made in Germany, guarantee 3 years
- Both sides can be equipped with magnetic clips V and roller clip V
- Automatic braking for vertical adjustment
- Noble: Aluminium, silver anodised
- Safe: Signal-coloured arm ends

Item	Colours	Length	For format	PU
626 00	08 aluminium	140 cm	A0	1 pc(s).
626 10	08 aluminium	107,7 cm	A1	1 pc(s).

Magnet clip V

- Sliding magnetic clips: For extension of swivel arms
- Made in Germany, guarantee 3 years
- With magnetic snapping mechanism
- Clever: Large documents can be affixed by one person
- The way it goes: Open clips (automatically stay open) enter documents and clips snap shut themselves and stay closed
- Magnetic clips lacquered on the inside to avoid rupture when pulling documents from closed clips
- Practical: Integrated hook which can be used to hang up keys or pictures

Item	Colours	Size (l x w x h)	Pieces/PU	PU
626 30	84 grey	4 x 3,6 x 1,6 cm	10	1 ctn.

Roller clip V

- Sliding roller clips: For swivel arms, wall rail and rollerclip wall rail
- Made in Germany, guarantee 3 years
- With roller snapping mechanism, even holds thicker documents
- Clever: Large documents can be affixed by one person
- The way it goes: documents only have to be pushed into the clips and they roll shut themselves. Lift the roll to withdraw the documents
- Practical: Integrated hook which can be used to hang up keys or pictures

Item	Colours	Size (l x w x h)	Pieces/PU	PU
625 20	84 grey	3,8 x 3,25 x 2,16 cm	10	1 ctn.

WORKPLACE DESIGN

» Visual communication

Varied, well structured, informative and effective on a long-term basis: these attributes are just as important for presentation products as they are for a good moderating technique. We have the right tools to capture ideas and information effectively

For decades we have been manufacturing all types of whiteboards in Germany. Every frame, every screw and every type of material has been carefully selected and thoroughly tested by our experts. This, combined with our metal-processing know-how, results in clever, durable boards.

» Competent, convenient and sustainable

AGILE WORKING

Flexibility and agility characterise the office of the future. Variable room concepts, desk sharing and rotating teams are part of everyday life. In this context, the working environment must adapt to the people and tasks. We have the right mobile visual communication products for this. Whether as a surface for creativity in meeting areas, as a scrum board for the next project, as a partition wall to colleagues, as an information board at the entrance or for an outdoor meeting: our mobile whiteboards, mobile information boards and flipcharts are easy to move and can be used in a variety of ways.
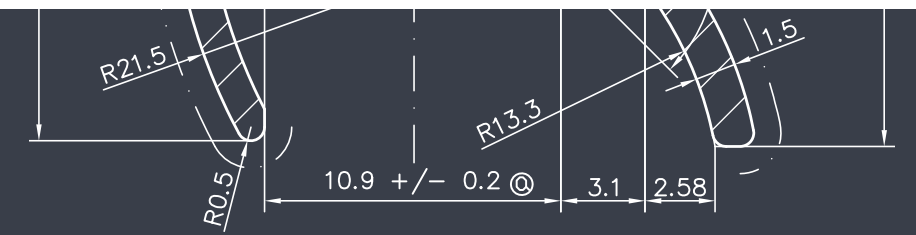

CLEVER ENGINEERING

The art of designing information boards is to make them very stable and light at the same time. Stable, so that the board does not warp over time or the frame comes loose. And light, so that it can be securely and conveniently attached to any wall or moved with little effort as a mobile board, information board or flipchart. As metal specialists, we know our way around here and focus on quality for a long product life. The mounting of the boards is also sophisticated, high-quality accessories included.
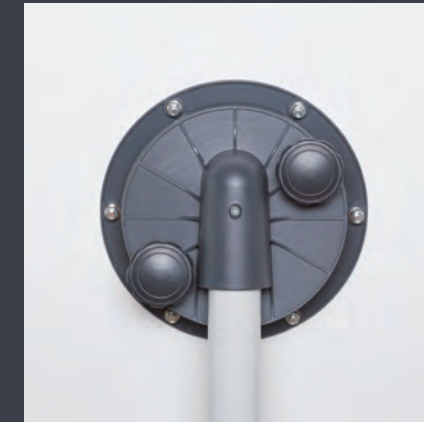

SELECTED QUALITY

In addition to cork, textile, paper and printed surfaces, we have opted for high-quality plastic and enamel coatings. Our whiteboard frames are largely made of aluminium, which makes the boards pleasantly light. To ensure a high level of stability, we have focussed on a strong material thickness, intelligent geometry of the profiles and a firm connection between the frames and the board. Corners and edges are shaped to prevent injury and the mitred corners comply with the German Federal Institute for Occupational Safety and Health. Underneath the coating is a carrier plate ingeniously designed by our developers. This so-called sandwich consists of a stable, coated steel sheet and a form-stable composite construction.

» Patentet mounting

Secure mounting of boards on any type of wall is essential. It is therefore advantageous if the board is light in weight, but nevertheless sturdy. This is particularly true in the case of large boards.

A lot of thought has been put into mounting MAUL boards; high-quality fittings are included. In the case of the MAULpro models, the patented excentric fitting is helpful. It allows you to adjust the board by up to 6 mm after hanging up.

» Enamel - wear-resistant & long-lasting

GUARANTEE ON THE 30 YEARS ENAMEL SURFACE

Enamel is our premium-quality surface. Formed at around 800°, it is very hard-wearing and durable and can withstand cleaning with strong detergents without incurring damage. Even permanent marker used by accident, graffiti or glue can be removed without problems. The environment is not contaminated: the necessary natural materials are sustainably available in sufficient quantity and enamelled products don't contain any dangerous materials. Enamel surfaces are also light- and heat-resistant and have a long life cycle. Joined together with the MAUL frames they become strong performance premium products.

» MAUL Stars ★★★★★

Find out the right model for your requirements.
If you are looking for the best of the best in terms of functionality, convenience and quality, the five star model is perfect for you.
Would you prefer beginner products with a good price-performance ratio? Then take a look at a three star model.

No matter what decision you make in the end:
All MAUL products undergo a technical examination and meet the quality requirements expected of a German brand company.

» How much can a magnet hold?

The adhesiveness of a magnet is measured in kg. A common misunderstanding is to believe that this is the same as the weight that the magnet can hold! An example: A magnet with 1 kg adhesiveness could hold a weight of 1 kg on the wall.

The specified adhesiveness is generally measured under the following prescribed, constant conditions:

Adhesiveness

Magnet

Steel plate, polished, 10 mm strength
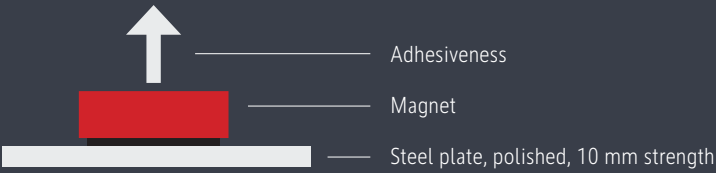

In practical use the adhesiveness of a magnet is reduced immensely by many different factors, e.g. by the composition of the product (smooth film compared to rough paper) or by the composition and strength of the backing board used.
For this reason, a 10 mm thick steel sheet is generally used as a backing board when determining the adhesion of the magnet. In comparison: A whiteboard steel board is between 0,25 - 0,45 mm thick, thus only one fortieth thereof. This is why a magnet with 1 kg adhesive force can hold considerably less on a whiteboard. Due to many factors it is not possible to give precise details on how much a magnet can hold.

As an orientation here is an example from our test laboratory:

Art. No.	617 51	617 71	617 91	616 86	616 88	616 94
Strength [kg]	0,17	0,6	1,0	3,5	14	20
Paper sheets [pcs.]	4	7	10	14	40	60

DIN A4 pages (80g/m²) were attached to a 0,45 mm thick coated steel whiteboard at room temperature. The determined values are only for orientation purposes and we assume no liability for these measurements.
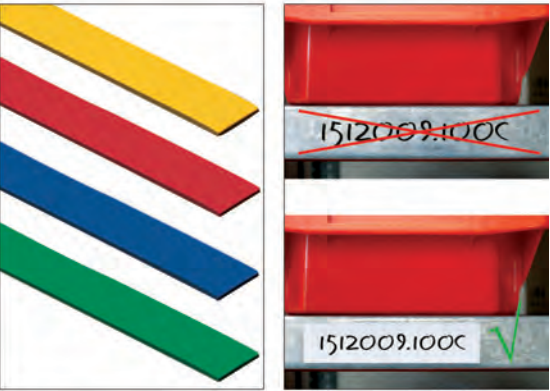

Writable marking band, magnetic

• Practical: For changing labelling on ferrous shelves in warehouses or sales rooms
• Also in schools, offices, cellars, kitchens or on whiteboards
• One side plastic coated, the opposite side magnetic
• How to: Cut the marking band with common scissors, mark, apply on the iron surface - done
• Can be written on with felt pens and markers
• Flexible magnetic band, thickness 1 mm

Item	Colours	Band width	Band length	Strength	PU
652 41	02 white, 15 yellow, 25 red, 37 blue, 55 green	1 cm	10 m	42 g/cm²	1 pc(s).
652 43	02 white, 15 yellow, 25 red, 37 blue, 55 green	2 cm	10 m	42 g/cm²	1 pc(s).
652 45	02 white, 15 yellow, 25 red, 37 blue, 55 green	3 cm	10 m	42 g/cm²	1 pc(s).
652 47	02 white, 15 yellow, 25 red, 37 blue, 55 green	4 cm	10 m	42 g/cm²	1 pc(s).
652 49	02 white, 15 yellow, 25 red, 37 blue, 55 green	5 cm	10 m	42 g/cm²	1 pc(s).

Magnetic band, self-adhesive

• Make your own magnets: With small objects, photos or other artworks
• One side self-adhesive, the other side magnetic
• Instructions: Cut the magnetic band, stick it, that´s it
• Advantage of magnetic band: Can't be seen from the front, flat application
• Flexible magnetic band, 1 mm thick
• Cutting: can be cut to length with normal scissors

Item	Colours	Band width	Band length	Strength	PU

» Ferrite or neodym magnet ?

FERRITE MAGNETS

Are worldwide the most-produced magnets and they are the classical office magnets. They are more robust and cheaper than neodymium magnets. With their colourful plastic covers one can accentuate as one pleases. The shipping is uncritical (except for airfreight).

NEODYMIUM MAGNETS

Have a high adhesive force compared with their volume, i.e. very small magnets can be very strong. Neodymium magnets should be used with caution. They are more sensitive than ferrite magnets, they can splitter easily and they oxidate quickly when the protection layer is lost or damaged. There are special safety rules which apply when using or sending neodymium magnets. Details are available under www.maul.uk.

The adhesive force of ferrite and neodymium magnets does not weaken under normal conditions of use. Keep magnets out of the reach of children.

greener@work

Facetted edge magnet MAULpro recycling

NEW

• greener@work: Made from more than 85% recycled post-consumer PS plastic
• Made in Germany: Manufactured in a sustainable way, 3-year guarantee
• The original from MAUL: A real classic, distinctive design and functionality
• Elegant: Facetted edge
• Safe hold: Special glue for strong fixing from the kernel in the housing
• The bottom of the ferrite magnet is lacquered for protection of the board surface
• Stable: Housing made of shock-proof plastic
• Available from 03 / 2024

VISUAL COMMUNICATION
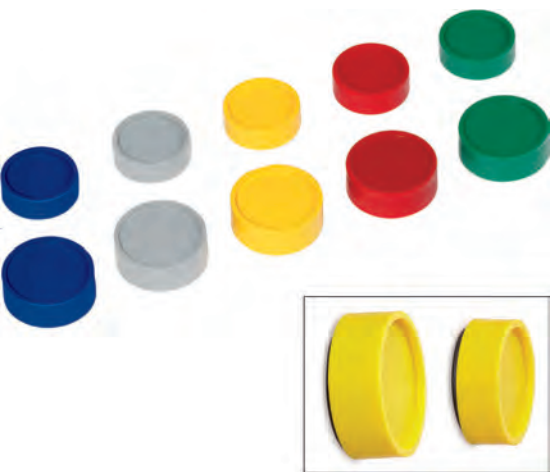

Industrial magnet

- Sturdy: Housing made of shock-proof plastic
- Particularly wear resistant
- Made in Germany: Manufactured in a sustainable and socially responsible way, 3-year guarantee
- Nearly indestructible: Particularly suitable for workshops
- Ideal: Also for production areas (many ferruginous surfaces can be used), e.g. to fix information on machines or to be used on metal locker or on racks for inventories
- Safe hold: A special glue ensures a strong fixing from the magnet kernel in the housing
- The bottom of the ferrite magnet is lacquered for protection of the board surface

Item	Colours	Size	Strength	Pieces/PU	PU
617 23	13 yellow, 25 red, 35 blue, 55 green, 84 grey	Ø 2,9 x 1,24 cm	1 kg	10	1 set(s)

» MAUL products with customer imprint

Many of our products can customized if purchased in sufficient quantities. Here are some examples of the numerous design options. The products are mostly screen printed or pad printed; multi-colour and special colour printing is possible.

Feel free to contact us for advice on the various printing options available.

VISUAL COMMUNICATION

» Office supplies

Useful office tools and modern accessories beautify the desk and make work easier. High-quality plastic moulded parts are produced thanks to the in-house expertise of our own plastic injection moulding shop and are dimensionally accurate and stable. Clear acrylic elements and high-quality metals round off the variety of materials. Precise design drawings and tested production processes ensure flawless quality. A dynamic development and production team is constantly developing new everyday helpers with special care and a trained eye for design and function. Many patents and utility models prove the uniqueness of the MAUL classics.

» The feel-good factor

EFFICIENT WORKING

They keep our desks tidy, keep chaos at bay and allow us to find what we are looking for at the flick of a wrist: little everyday helpers that weigh, light up, clamp or calculate. An efficiently organised workplace saves time and allows you to focus on the important and urgent tasks. With clever features in a variety of materials and designs, beginners and professionals alike will find innovative products that make everyday work easier.

Awards refer to the clipboard, round box and clip dispenser.

greener@work

ENVIRONMENTALLY FRIENDLY WORKING

Yesterday a flower tray, today a clipboard: there are many ideas for protecting the environment, especially in the office. We pay attention to sustainability at all stages of production. We are increasingly using recycled waste plastics, for which many products have already been awarded the Blue Angel quality label. Our solar scales and our unique range of calculators with solar technology save millions of batteries. Consciously selected materials with short transport routes and low-pollutant production in Germany protect our environment and thus our quality of life in the long term. As much as 70% of our product range is already packaged without plastic and we even ship some products that are particularly insensitive during transport almost without packaging.

TRENDY WORKING

Colours put us in a good mood and highlight our individual taste. Brightly coloured accessories bring vitality into our everyday lives. The colours in our #COLOURMYWORK series are particularly chic and can be easily combined with each other. With acrylic products or our picture frames you can elegantly showcase your motifs, while shiny chrome or brushed stainless steel emphasise the sophisticated look. All-rounders like our clipboards can be used anywhere, as a mini desk, picture holder on the wall or for DIY projects.

MAUL

Clipboard series 231 MAULpro, plastic

• The original from MAUL. A true classic, distinctive design and functionality
• Non slipping: Red, rubber-like retainer bar holds the paper in place

simply clip & write
Great variety: From hobby to professional.

We have manufactured clipboards in Germany for decades. We know our way around here: In material, technology, clamping force and quality. We offer the widest range of products in Europe.

Whether as a postman or parcel carrier, as a coach on the sidelines, in the warehouse or at the surgery: clipboards are practical helpers everywhere when it comes to writing, drawing, taking notes or DIY projects.

Clipboard folders protect your documents with an additional cover or even have a storage compartment to protect them from dust, impacts or rain.

» With you wherever you go

Clipboards and clipboard folders help wherever you need to take notes on the go: As a tradesman or parcel carrier, during stocktaking, at university, at sports or in a café.

DIY projects are all the rage: Knotting macramé or friendship bracelets, lettering or painting the clipboard yourself.
There are many more ideas - let yourself be inspired.

» Clips for pros

THE CLIP

Alongside the board, the most important thing is a good clip. We know our trade: MAUL has decades of experience in the area of clips and in metal manufacturing. This is how the MAULpro clip and the manufacturing techniques for it were developed inhouse.
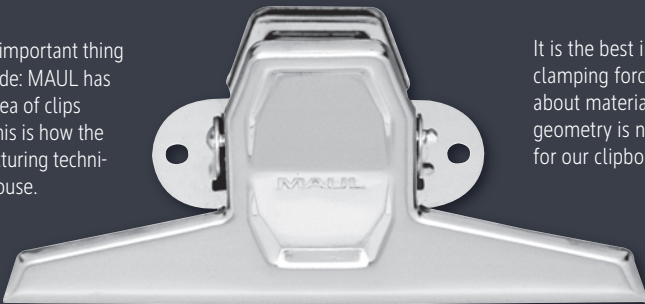

It is the best in terms of material quality, clamping force and durability. This know-how about material selection, clamping springs and geometry is now applied to each and every clip for our clipboards. You can be sure of that.

Yesterday, a flower tray – today an office organizer : This desk collection is designed to be sustainable over its entire life cycle. We are particularly proud of the "Blue Angel" certificate, which has been awarded as the products are made from at least 85% recycled post-consumer plastic, i.e. from the waste of commercial and private final consumption. They are produced in a socially responsible way in Germany, have plastic-free packaging and can be 100% recycled.

Printing desktop calculator MPP 32

- Universal model with all important functions in MAUL quality
- Mains and battery powered, includes one battery (CR2032)
- Computer-like keypad
- For calculation and sales: With revenue-cost margin function
- Also for exports: with currency conversion
- Better readability: 2-colour printing
- Modern design

Item	Colours	Display - digits	Weight	Size (l x w x h)	PU
727 20	84 grey	12	485 g	27 x 15,5 x 8 cm	1 pc(s).

Printing desktop calculator MPP 123

- Top model with an extensive range of functions
- Energy-saving mains operation
- Computer-like keypad
- For calculation and sales: With revenue-cost margin function
- Also for exports: With currency conversion
- Better readability: 2-colour printing
- Many more functions

Item	Colours	Display - digits	Weight	Size (l x w x h)	PU
727 25	84 grey	12	709 g	31,2 x 19,4 x 10 cm	1 pc(s).

For the nature-conscious
At school
On the construction site
For craftsmen
In the workshop
For the commercial service

» You can count on us

Whether they're used in educational or private settings, desktop and pocket calculators are important tools which many people rely on. At MAUL, we have the right model for all of the most important areas of application, allowing you to find the right solutions quickly and conveniently.

Precision, style and reliability – these are the areas where our calculators shine, as we are motivated to ensure **high quality** and **stylish design.** Our range includes compact pocket calculators, calculators for sales applications (for example with a tax calculation function) and ergonomically designed printing calculators for commercial use.

All calculators (except the printing models) can run on **solar power to save energy,** in line with the **MAUL sustainability goals**. What's more, all of our desktop and pocket calculators come with a **5-year warranty.**

OFFICE SUPPLIES

MAUL

Cash boxes with coin counter tray

• Cantilevered coin tray allows easy coin removal
• Designed by MAUL
• Painted steel
• Security cylinder look with 2 keys
• Shock-proof plastic coin-tray
• Euro coin tray with scales of value for all 8 Euro coins
• Lid remains open automatically

Item	Colours	Number of compartments	Number of handles	Size (l x w x h)	PU

OFFICE SUPPLIES

MAUL

» We're passionate about precision
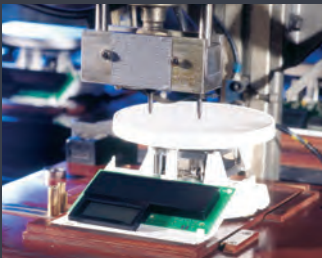

The manufacture of scales is a craft that we are particularly proud of mastering. Making scales is all about precision and attention to detail. The sensor of a 2-kg weighing scale moves by as little as 0.00035 mm when a 1-gram weight is placed on it – an amount not detectable by the naked eye. Even when the maximum load of 2 kg is applied, it only moves by a minuscule 0.7 mm. Our tolerance limit for electronic scales is 0.5% +/- 1 unit increment and applies for a temperature range of 5° to 40°C, which is stricter than prescribed by law. With the help of computer calibration and double final inspections, we ensure compliance with the regulations.

» The A-Z of scales

MINIMUM WEIGHT

All scales require a minimum weight to start the weighing process. Weights below this threshold are not detected by the scales.

ADJUSTMENT / CALIBRATION

All MAUL scales are calibrated after assembly, which means they are adjusted and tested to ensure precise results. In the case of user calibration, you utilise the calibration weight to check and adjust your scales yourself following prolonged use.

DIVISIONS

The unit increments of the scales. The smaller the divisions, the more accurate the weight measurement.

TARING / TARES

Tare function. Serves the measurement of an additional weight, e.g. after placing a container on the scales. Place the container on the scales, re-set the scales to zero by pressing the tare button, then place the item to be weighed on the scales and read the net weight (= without the weight of the container).

UNIT SELECTION G/LB/OZ/ML

The scales can weigh in standard units used in foreign countries. oz is the unit symbol for ounces, lb (lat. libra) stands for pounds; ml is a unit of volume, e.g. for weighing liquids.

LOAD CAPACITY

Defines the maximum weight that can be measured. Exceeding this threshold by a significant amount may damage the scales.

COUNTING FUNCTION

For determining a quantity without counting all the individual items: establish a reference weight, for example by placing 10 screws from a pack on the scales. This value is stored. Then place all the packs on the scales; based on the weight, the scales calculate the total number of items.

AUTOMATIC SHUT-OFF

After a specified period of time, the electronic scales switch off automatically if not in use in order to save energy.

Solar letter scale MAULtronic S, 2 kg/5 kg

www.blauer-engel.de/uz116
greener@work

- Awarded the environmental award "Blue Angel"
- Made in Germany, 3 years guarantee
- greener@work: No need for battery replacement or disposal. Plastic-free packaging
- Top solar technique with low power ASIC technology, patented measuring system
- Excessive energy is stored and used under dark conditions (under 150 lux). The statutory minimum lighting level in offices is 500 lux
- Stable: Shock-proof plastic case
- One key operation: On-Off-Tare-Hold

OFFICE SUPPLIES

» OUR SYMBOLS

In order to understand the special advantages of our products at a glance you can find the symbols by the item.
An additional explanation can be found here:

Developed and produced in Germany

The original from MAUL. Developed and designed in Germany

Special emphasis was placed on stability

All MAUL products have at least a 2-year guarantee, some chosen products have a 5-year guarantee

All MAUL products have at least a 2-year guarantee, some chosen products have a 3-year guarantee

30-year guarantee on the enamal surface of selected whiteboards if used properly

Approved security by TÜV Thüringen

Approved security by TÜV Rheinland

Approved security by Intertek

The illuminance level of this lamp can be adjusted

Colour temperature adjustable

Products with this symbol have a high level of sound absorption

greener@work — The products of the greener@work series are sustainable and good for the environment

COLOUR MY WORK — The trend colour series

98% of the materials used can be recycled

This product consists of over 85% recycled plastic (post consumer material)

The housing of this product consists of 60% to 80% of recycled plastic (post-consumer material)

Awarded the „Blue Angel" eco-label

»The working world of tomorrow

COMMUNICATION AND CREATIVITY

Agile working methods have changed the way that we work together. Autonomous teams meet to exchange ideas in modular meeting areas. Employees from cross-functional fields lead ideas workshops or use face-to-face exchange after a longer home office phase. Modern workplaces need solutions to promote communication and creativity. This calls for stable materials and robust products that can cope with dynamic use. For example, presentation boards and flip charts with sturdy frames for collective brainstorming or presentations. High-quality whiteboards with an enamelled, scratch-resistant surface are ideal for creative ad hoc meetings. Versatile facilitator's toolboxes, unbreakable magnets, markers and flip chart pads are a must. Standing desks offer extended storage space or, probably the smallest work surface for flexible locations, a dedicated clipboard on the arm.

MOBILITY AND FLEXIBILITY

Today, open-plan concepts and co-working spaces combine individual and teamwork in a large office space. Working from home in the morning, later on the train or in the office at a desk-sharing station – the world of work is flexible and people are no longer bound to one place. Changing work locations and extensive offices require mobile work equipment and customisable tools. These are mobile boards that can be easily rolled from room to room; partition walls that can be quickly pushed together to form a screened work area or mobile tables for stand-up meetings. Writing folders and bulldog clips support your everyday work. Healthy working must not be forgotten in all this dynamism. Footrests and height-adjustable desks ensure an ergonomic posture. Well-lit rooms with direct and indirect light are easy on the eyes and keep us active.

FOCUS AND EFFICIENCY

Group offices can quickly become loud and stressful. Errors occur, productivity decreases and personal satisfaction dwindles. Think spaces and retreats are therefore ideal for confidential discussions or focussed activities. A healthy working environment also requires a well-designed lighting scheme and an ergonomic working space. An attractive workstation has partition walls and desk dividers for a clear focus on your own work area. Partition wall systems with acoustics offer optimum sound insulation for quieter, stress-free working. Height-adjustable desks and footrests help to prevent slouching. The room has the right lighting when the surroundings are well lit and a direct light source is available at the workstation. Ideally with infinitely variable brightness and colour temperature which can be adjusted for every visual task. We often neglect appropriate work equipment when working from home; we should be mindful of our bodies – wherever we work.

WORK-LIFE INTEGRATION

Flexible working time models and mobile working enable us to better adapt our work activities to our personal lifestyles. This means that the office is no longer just a place to work, but also a feel-good environment. A homely atmosphere with furnishings such as cosy wooden furniture, creative lighting designs, colourful desk accessories or plants on the interior walls help introduce harmony and relaxation into our working environment. Colours and decorative details have a galvanising effect and foster creative thinking. It's a feel-good factor, especially when our surroundings are also environmentally friendly. Natural materials such as pinboards made from renewable cork, desk accessories from the #greener@ work series made from at least 85% recycled plastic or battery-free, solar-powered calculators are ideal. Other ideas for a little more pepp and individuality in the office are bright neon writing surfaces or coloured table lamps.
