## CALCULATOR

2022

## »WHY WE THINK SUSTAINABLY

We have the privilege of living and working in a place surrounded by nature. For over a hundred years, we have been based in the Odenwald and Westerwald. Consequently, we are well aware of what we owe ourselves, our families, society and our partners. For us, appreciation of nature and respect for human beings is the key to responsible trading.

As a fourth-generation family business, we treat things with care and conduct our operations on a sustainable basis. We view the efficient use of resources throughout the entire product life cycle as a self-evident maxim. When you buy a MAUL product, you can rest assured that it was manufactured under socially responsible conditions with minimal environmental impact.

We firmly believe in Germany as a business location and have expanded our production facilities in Zell and Kirchen. We invest and pay taxes here, create and retain apprenticeships and jobs, and actively take responsibility for the future of our region.

For further information, go to [www.maul.uk](http://www.maul.uk) and take a look at our Sustainability Brochure.

„We are certified for our environmental management system according to the international standard ISO 14001“.

## »WHY WE KNOW OUR TRADE

For generations, we have been manufacturing products in Bad König and Kirchen that simplify day-to-day office tasks – always with a keen eye for detail.

Our specialists in the fields of metal manufacturing, plastics production and electronics work with great care and precision on every single component. As we select the materials and develop the products ourselves, we can guarantee top quality and high-end design. Our intelligent testing processes ensure that all MAUL products conform with high safety standards and are of a consistently high quality.

To find out more, go to [www.maul.de/en/company](http://www.maul.de/en/company)

## »WHY WE LOVE WHAT WE DO

*MAUL employees from Sales and Marketing  
with the mobile whiteboard easy2move*

MAUL is an international brand-name company with production facilities at two locations in Germany. Over one thousand innovative products made from plastic and metal are manufactured here. We draw on our ingenuity, experience and flexibility to design and produce a multitude of creative new products. As a result, we are able to add exciting new products to our product range year after year. This innovative capability is evident from our numerous utility models and patents.

The skills of the 190-strong MAUL workforce combined with our enthusiasm for progress and our high-tech in-house production facility are what makes us so good at what we do. We act quickly and flexibly, with a high level of motivation and identification with our work. Our focus is not on short-term solutions, but on good, durable, creative products – in line with our company philosophy, which has proved successful for more than a hundred years.

## »TOMORROW'S WORLD OF WORK

### »CONCENTRATION / EFFICIENCY

The workspace is becoming a retreat for tasks that require lengthy periods of concentration. This is a peaceful environment where your stress level falls and you can work in a shielded setting without any distractions. In the case of flexible workplaces, dividing walls provide privacy. Quiet spaces and "think" spaces are used for relaxation, while also facilitating concentrated work on an individual basis. Phone calls are made from sound-insulated audio rooms where 100% silence is guaranteed. Flexible working hours and locations free up office space. Fewer mistakes are made; efficiency and productivity increase.

### CREATIVITY / COMMUNICATION

The office of tomorrow is more than just a workplace; it's a place for meeting and interacting. People meet up face-to-face to discuss ideas or findings. This communication culture facilitates creativity and rapid knowledge transfer. There need to be spaces large enough to cater for teamwork. In "smart" meeting areas, information flows faster; in work & play zones, new solutions can be developed in a fun way. Mobile presentation tools that can be adapted to the size of the team provide assistance with creative techniques. Everything is in flux.

### WORK-LIFE INTEGRATION

The boundaries between work and home are disappearing; professional and private lives are merging due to digitisation. There is a desire for feel-good surroundings that generate satisfaction and maintain health. Ergonomics are not only important in the office, but in all areas of life. Movement is being encouraged; sport and play areas are being created along with recreation zones and relaxation oases. There, in contrast to the work areas, the emphasis is on de-digitisation. Biophilic design is an ongoing trend: connectivity with nature via plants and other natural elements facilitates well-being and improves air quality.

### MOBILITY / FLEXIBILITY

Working when and where you want. Data and information come from the cloud and can be accessed anywhere via mobile devices. This means you're free to choose where you want to work, depending on your personal situation and the tasks on hand. It may mean working in co-working spaces or from home, and desk-sharing at the office the next day. Alternatively, you may find yourself doing concentrated tasks in "privacy areas" and attending a meeting in the "creative center" an hour later. When it's time for a break, you can enjoy some relaxing music in the "quiet room" before preparing for the next meeting on a train or plane.

## »CONCENTRATION EFFICIENCY

A shielded setting is the key to concentrated work. Mobile moderation boards provide the necessary privacy. At the same time, the various different surfaces can be used for visualising information. Another factor to consider is ergonomics, as body posture is mostly static in the case of focused activities; you don't move about a great deal. Therefore furniture that can be adapted to the user, such as height-adjustable desks, are important. Footrests are helpful if the desk height is unsuitable. There is also a need for lamps that can be adapted easily to movements of the desk and provide direct illumination of the workstation. The best option is variable lighting intensity and colour temperature to cater for every task.

## »WORK-LIFE INTEGRATION

This is where we appeal to the senses, as the working environment should be attractive, sustainable and comfortable. Products manufactured in Germany using low-emission methods satisfy the need to save resources. Memo boards and clipboards made from natural materials such as cork or wood also meet the need for sustainability. An attractive wall clock or coloured accessories, for example the new colours from #colourmywork, provide personal touches. Heated ergonomic footrests and standing-height tables improve physical comfort and help you stay healthy. The same applies to lamps with alternating light colours. They provide sufficient illumination for focused work and warm white light for meetings or relaxing breaks.

## »CREATIVITY COMMUNICATION

The business world is calling for products that are hard-wearing and thus meet the demands of ever-changing teams. Sturdy frames, durable materials and robust mount fittings withstand intensive use and even the most boisterous of creative thinkers. For large rooms, boards measuring up to 3 metres in width are ideal. Double-sided mobile boards with rotating panels and flipcharts are easy to roll around. Suitable for writing, drawing and clamping and usable with magnets, post-it stickers and flipchart pads – good boards are genuine all-rounders when it comes to creativity. If you're short of desk space, a standing-height table is helpful; another option for individual workers is a clipboard: the smallest flexible work surface available.

## »MOBILITY FLEXIBILITY

A highly dynamic work situation calls for tools that are adjustable, both to the task on hand and, above all, to the people – products that you can easily take with you or move around. Rolling panels and boards allow you to create flexible working areas and meeting zones, while also serving as an information medium. Movable, height-adjustable standing tables provide additional desk space as well as a surface on which to place miscellaneous items at meetings; moreover, they also ensure an ergonomic posture. Other helpful accessories include lamps that complement room lighting, provide direct illumination of the work surface and adapt to every movement of the table, or cable-free lamps that fit in your pocket. Equally useful are clipboards that can serve as a substitute for a table.
